

**REGENCY INTRASTATE GAS LP
WEBSITE POSTING FOR AVAILABLE CAPACITY**

Effective August 2010

Overall System Capacity Available for Firm Transportation Services*: 82,200 MMBtu per day

Additionally, limited capacity may be available where the receipt and delivery points are both upstream of Regency's mainline compression or where the receipt and delivery points are both downstream of Regency's mainline compression.

***NOTE – THE AVAILABILITY OF THE POSTED QUANTITY ABOVE IS STRICTLY SUBJECT TO THE FOLLOWING CONDITIONS:**

1. Daily operational fluctuations due to operating conditions on third-party receipt and delivery pipelines; RIGS' system operational needs, variances and conditions; and location of individual Receipt and Delivery Points requested for firm transportation service;
2. Availability of capacity at the individual Receipt and Delivery Points, which will vary from the overall system capacity due to prior contractual commitments, physical limitations of the interconnects and normal daily operational variances;
3. Anchor Shipper right of first refusal procedure (please see our Statement of Operating Conditions as filed with the FERC and posted on our Website); and
4. Requirements set forth in our Statement of Operating Conditions posted on our website.
